ELECTRONIC JOURNAL OF GENERAL MEDICINE

Electronic Journal of General Medicine (*Abbrev. Electron J Gen Med*) is an English multidisciplinary peer-reviewed medical journal publishing articles in the fields of general medicine with ISSN 2516-3507. Electronic Journal of General Medicine is published bimonthly (January, March, May, July, September and November).

Electronic Journal of General Medicine encourages submissions from all authors throughout the world. Manuscripts are judged by two experts solely on the basis of their contribution of original data, ideas and their presentation. All manuscripts must comply with Manuscript Preparation Guidelines. The following articles will be considered for publication: editorials, original and review articles, brief reports, case reports, letters to the editor, and book reviews. Submitted manuscripts must not have been published, accepted for publication or be under consideration elsewhere. Investigation on human subjects should conform to the guidelines noted in the World Health Organization Chronicle 1976; 30: 360-362. All articles will be critically reviewed by the editor and members of the editorial or advisory board of the journal within 2 months, but longer delays are sometimes unavoidable.

Authors are referred to the statement on uniform requirements for manuscripts submitted to biomedical journals prepared by an international committee of medical journal editors. (*Br Med J* 1982; 284: 1766-1770, *Ann Intern Med* 1982; 96: 766-771.)

The background features a complex, abstract molecular structure composed of numerous blue, semi-transparent spheres of varying sizes, interconnected by thin, metallic-looking rods. The spheres have a faceted, crystalline appearance. The overall composition is set against a gradient of blue, from a darker shade at the top to a lighter shade at the bottom.
